

## **Illuminum Green Houses**

Taita Ngetich, 5th year Mechanical Engineering student, University of Nairobi is a semi finalist of the GIST (Global Inovation for Science and Technology) for their inovation- Mkulima Hodari.

Mkulima Hodari is a Green house automation system with sensors that monitor temperature, humidity and soil moisture and regulates water through the drip lines.

The system is then linked to the farmers mobile phone via sms to enable remote monitoring and control.

For them to proceed to the finals to be held during the Global Entrepreneurship summit in July please visit the link and vote for them every day.
